Minnesota is home to one of the largest Hmong communities in the United States. More Hmong live in the Twin Cities than in any other urban area in the United States. Originally from Laos, the Hmong supported American troops during the Vietnam War. Beginning in 1976 and continuing in four waves until 1996, many came to the United States as political refugees. The Hmong have strong kinship and clan ties. Many who originally were resettled in other areas, chose to move to Minnesota to be close to family members and other relatives.

The elder women’s experiences included maintaining home and family while their husbands fought alongside American soldiers in the Vietnam War. They fled their farms and villages and crossed the Mekong River into Thailand where they lived in refugee camps before resettling in the United States.

The experiences of the oldest members of the community are vastly different from those who came here as children and those who were born in this country. Today, Hmong women work as teachers, lawyers, and decision makers in their respective positions—opportunities not available to them in their homeland. The youngest never experienced war or resettlement and are unfamiliar with the privations of their elders.

This oral history project chronicles the contributions and experiences of Hmong women with ties to Minnesota. Members of the Hmong Women’s Action Team, a group of Hmong women community leaders and activists, interviewed each other and their mothers and grandmothers, and in one case her daughter. They share their stories of life in the Minnesota, Thailand, and Laos. Three generations from six different families are represented in this series of eighteen interviews.

The interviews help provide a greater understanding of Hmong women’s roles in the home and community, challenges and successes in public and private realms, and across time and space.

Yer Moua

MNM: What is your maiden name?

YM: My maiden name is called Yer.

MNM: What is your clan?

YM: The Vue Clan.

MNM: The Vue Clan? Okay, what clan did you marry into?

YM: The Moua Clan.

MNM: How old are you now?

YM: I am 65 years old.

MNM: Ok, how many children do you have?

YM: I have four children.

MNM: Ok, but one passed away, right?

YM: All of them are still alive….

MNM: Oh! Oh…

YM: He is Thong Moua.

MNM: What is the highest grade that you completed?

YM: I have had no education at all.

MNM: Okay, have you gone to school at all?

YM: Not at all. Carried the basket (kawm) and farming was all I did back in Laos.

MNM: What about after you came to this country, did you go to school at all?

YM: Yes, I did. I kept receiving diplomas too.
MNM: Okay, what kind of jobs are you doing now?

YM: I only work around the house.

MNM: Okay, what do you think your income is… How much do you make per year? Is it between $10,000 to $20,000, $20,000 to $50,000, or $50,000 and up?

YM: I only work around the house, so I only made about $500 per month.

MNM: Ah!…Okay, when did your husband passed away?

YM: My husband passed away before General Vang Pao moved to Thailand.

MNM: You were very young then, so how come you decided not to get married again?

YM: Yes, I was very young, but there was no one that I really liked. The one that I liked was very old and the ones that admired me, I didn’t like them.

MNM: So the one that you liked, they didn’t like you. The one that you liked they were old and had children already, so that was why you decided not to get married, right?

YM: Yes.

MNM: Oh! Okay, Right now you are living with all of your children, right?

YM: Yes, I am.

MNM: How long have you been in this country?

YM: I have come to this country…I don’t know how many years, but I have been here since 1981.

MNM: Okay, so…

YM: Right now is the year 2000…

MNM: So… It has been 19 years.

YM: Yes.

MNM: Where were you born?
YM: My mother and father gave birth to me in a town called Thab Tam, located in the state of Xeev Khuam.

MNM: Okay, what is your clan?

YM: I have told you that I am part of the Vue Clan.

MNM: Are you White Hmong, Blue Hmong or the Stripe Hmong?

YM: White Hmong.

MNM: White Hmong, how come you are not speaking White Hmong?

YM: Yes, I am speaking White Hmong too.

MNM: Yes… Yes…

YM: Maybe you can’t tell.

MNM: What about right now, do you still carry the old tradition or are you a Christian now?

YM: We are Christians now.

MNM: Why did you decide to become a Christian?

YM: It’s much better to be a Christian than the old tradition. Back then I didn’t know anything that is why I thought that the old tradition was better, but now that I know more... The new way (Christianity) is the truth. Christianity is the way God intended for all of us.

MNM: You had mentioned that when you were young, you had not attended school at all, right?

YM: No, I had not attended school at all.

MNM: What about your brothers, were they attending school?

YM: Regarding my brothers, we only sent one person to school.

MNM: Only one, why?

YM: Within our immediate family.
MNM: Why did you only send one person?

YM: Because we did not have enough money.

MNM: Oh! So you only had enough for one person?

YM: Yes, everybody worked to send him to school.

MNM: Okay, when you were a child, the chores that you did to help out around the house… What kind of work was that?

YM: The chores around the house were such as… feeding the livestock, sweeping the floor, and preparing meals for my parents.

MNM: Okay, was there any other work that you did to help out your relatives or the community.

YM: There was none.

MNM: So you only worked for your family, right?

YM: Yes.

MNM: Okay, when you were young and still a child… What were some of the duties that you had learned?

YM: Back then when I was still a child, I learned how to do handicrafts, learned how to work on the farm and there were lots of things to do.

MNM: So you did handicrafts and worked on the farm.

YM: Yes.

MNM: Did you cook?

YM: Yes, the first thing you learn as a young girl was how to do handicrafts. You learned how to cut the fabric for your mom and she taught you how to do it then. After you were about eight years old then you started to learn how to work on the farm.

MNM: Did you feed the livestock too?

YM: Yes, I had to feed the livestock too.

MNM: What about doing laundry?
YM: When it comes to doing laundry, then you had to do your own.

MNM: So your brothers, did they do their own laundry?

YM: My brothers, they just gave their clothes to me to clean for them.

MNM: Oh! When you were a teenager, what were some of the things that you did for fun?

YM: The things that we used to do for fun were getting together and playing, attending the New Year Celebration, and getting together for a feast or something like that.

MNM: So you attended the New Year Celebration and helped others prepare food for their celebrations, right?

YM: Yes.

MNM: Was there any time that the young boys and girls went to play by themselves?

YM: No, there wasn’t. I don’t know about the boys, but for us, the girls we had time to play too and our parents always went with us.

MNM: So the girls went to play as a group with their parents, right?

YM: Yes, our parents always sent at least two moms to go with the girls.

MNM: So was there a time that they went by themselves?

YM: No, there wasn’t. We were much too different than what you are here.

MNM: Okay, what were some of the things that you wanted to accomplished and wished that you would have had as a young teenager?

YM: I wanted to be a highly educated girl. That was what I wished for.

MNM: An educated girl?

YM: I wished to be educated, smart and be able to speak other languages, but I did not have anyone and there was no teaching like that.

MNM: Because someone else went already. There was not enough money to go so they sent one of the boys instead, right? So you wanted to learn other languages and you…

YM: I wanted to learn other languages, wanted to be rich, and I wanted to be the most beautiful girl of all.
**MNM:** Oh! Really? Okay, what about the duties of a woman, what were they?

**YM:** These are some of their duties... Farming, take care of the livestock, raise the children, take care of your family and prepare meals for your husband and your family.

**MNM:** What about during the war? Had their duties changed or were they still the same as they were before the war? Such as was there more work to do because the men were drafted to become soldiers at the battlefield.

**YM:** The men went to the battlefield and it seemed like there wasn’t that much more to do because during the war we did receive some rice that was supplied to us by the government. All we had to do was to raise the children and find ways to make more money to buy food and prepare it and send it to the men at the battlefield.

**MNM:** Were you farming during that time?

**YM:** Yes, we did, but on a much smaller scale. We were moving from place to place because of the Vietnamese soldiers were chasing us and because of the migration, we only had a few livestock.

**MNM:** The livestock was not as big as it was before, right? So if the men were at the battlefield and you were the one who took care of everything around the house, wouldn’t you have more work than before?

**YM:** There were lots of work to do because the man were at the battlefield, so you just had to raise the children yourself and farmed a small field to help out the family.

**MNM:** Yes, yes, yes... Were you doing any kind of business during that time?

**YM:** Business... There were some that did it, but others were not doing any business at all.

**MNM:** What about you, did you do any business?

**YM:** Yes, I did.

**MNM:** What kind of business did you do?

**YM:** I sold shirts, dresses and tobacco.

**MNM:** Did you buy them from someone else and resell them or did you...?

**YM:** I had to travel far away to buy and then I sold them to the soldiers. I went into the boot camp and sold to the soldiers when they received their pay.
MNM: You went and bought it from someone else and they buy….?

YM: It’s because there were helicopters that could take us to their place.

MNM: So how did you come back after you had traveled to their camp because…?

YM: I went to the camp where the soldiers were and sold to them…

MNM: Within your family, what is the role of a woman in the decision-making process?

YM: Within my family, the role of a woman in the decision-making process, I don’t know how she made the decisions and in what way…?

MNM: Such as… How did you make decisions within your family? Were the decisions mostly made by the man, the woman, or both?

YM: Oh! It was both the man and the woman.

MNM: So both the man and the woman talk before making any decisions such as… How are they going to do this or that? How much money they were going to spend?

YM: For us, the Hmong people, you had to get the permission from your husband before you can spend the money.

MNM: What about within your relatives…? Who normally made the decision? Was it always the men, the women or both?

YM: Within our relatives… If there was a discussion, they will not let the women know about it or they would not let the women attend the meeting, only the men were allowed to attend. This is the Hmong people’s rule.

MNM: So then all the decisions were made by the men, right?

YM: The man made all the decisions except that when he needed to take out the money then he would let you know about it.

MNM: Oh! So within your immediate family, both the husband and wife talked about it before making any decision, but for others, the men usually made all the decisions, right?

YM: Yes, they wouldn’t allow the women to attend. In fact they wouldn’t even allow the women to come close to the meeting because they might have heard what the men were talking about.

MNM: How come they won’t let the women sit in the meeting to have the discussion with the men?
YM: This is because the men see the women as at a lower level than they are. They had mentioned that they did not allow the women to hear about the discussions because they might go out and tell other people about it.

MNM: Oh, you mean within our Hmong people and around the communities, it was like that?

YM: Yes.

MNM: Okay.

YM: When they had a meeting, they would not let the women know about it at all.

MNM: Okay, what about during the war when all the men were drafted to become soldiers, were there any women that you knew of that had become leaders?

YM: Within our Hmong women, there was no one who became a leader at all.

MNM: Is that right? So mostly they were the men, right?

YM: Yes.

MNM: Okay, what are the things that the woman did to help out her family?

YM: The things that the woman did to help out her family were to work and earn money to help out the family. She made sure that there was enough food to eat and prepared the meals for the family.

MNM: You have mentioned doing handicrafts and working at the farm. Would these be some of the things that the woman did to help out her family?

YM: Yes, those are the things that did help out.

MNM: Okay, I see.

YM: Within the Hmong people, we had to prepare like that because we needed the clothes to wear.

MNM: So preparing clothes for your husband and your children were the duties of the woman, right?

YM: Yes.

MNM: Okay. Who was the one that did the preparing or planning to have children?
YM: Who would ever be prepared for that?

MNM: The decision that was made to start a family and have children, was it made by both of you after you had talked about how many children that you two wanted to have? Such as you two should have four children, five children or ten children? Who was the one who made the decision?

YM: The Hmong people probably don’t have that. I don’t know about others, but for the Hmong people, I’m afraid we don’t have anything like that.

MNM: You mean there was no communication between the husband and the wife?

YM: There was no communication at all, we just kept having child after child.

MNM: [Laughter] Didn’t they talk about how many children that they wanted to have at all?

YM: I don’t know much about it, we just took whatever we got.

MNM: So then you just kept having baby after baby, right?

YM: Yes.

MNM: Why did you have lots of children?

YM: Why, I don’t know… We didn’t know how many we wanted to have at all.

MNM: So you had never thought to yourself that you only wanted five children…?

YM: No, we just took what we could have.

MNM: So if you have ten children, then you will take ten and if you have twenty children then you will take twenty?

YM: We had to have them all or go until we could no longer bear children.

MNM: Was there a time that you could not longer have children?

YM: Oh… They could run out.

MNM: But then you already 50 or 60 years old, right?

YM: If you were 50 or 60 years old and you could still have children too.

MNM: So within the Hmong people, there was no communication between the husband and wife about how many children they wanted to have at all, right?
YM: No, they did not talk about it because they did not have any plan at all. At that time we did not have any education at all and we did not have any plan about how many children that we wanted to have.

MNM: Okay.

YM: We didn’t know how many children the stuff in your body was willing to accept. It could be twenty or thirty, who knows.

MNM: But there was no communication about this is the number of children that we wanted to have, right?

YM: We didn’t know anything about that at all.

MNM: Oh… Okay, back in Laos what did they use for birth control if they did not want any more children?

YM: There are no rights, no abilities like that at all. That is something new that we only heard about it in this country and after we escaped to Thailand was when we started to hear about these abilities.

MNM: What do you think about the Hmong people’s reaction to those abilities that they could use different type of birth control to help then… Do you think they like the ideas or those abilities?

YM: I don’t know, maybe they liked it. They must have liked it in order for them to use it.

MNM: But after we came to this country we didn’t need to have ten to fifteen children anymore, right?

MNM: They don’t need the children anymore. That is why they use it.

MNM: Okay… When is the time that the women receive the most respect or praise from their family and other people?

YM: Based on what I saw, the Hmong people did not praise the women at all. There was none. Regardless of how big…

MNM: What about you? Was there a time that people treated you with more respect and with value? Such as when we were very young and after we had become teenagers, others did not respect us… When was the time that they treated us with more respect?

YM: They valued us the most when we were teenagers. The only time that we got the invitation to go and eat with the leaders or celebrate New Year with the leaders was when we were teenagers. But after we got married, there was none.
MNM: So there was none... Do you think that there will ever be a time that the Hmong people would give us, the women, more respect?

YM: They don’t give respect at all...

MNM: Is that right? Okay. What is it that made them not respect us women? Was it because of sometime we did, something wrong to make them not respect us? When and why don’t they respect us?

YM: The time that they had no respect for us was... Let’s say if your husband left you for some reason and regardless how right you are, people would not respect you because they already are making the assumption that you are the bad one. All your children were taken away from you and they even had you pay for the child support too so there is no respect for us at all.

MNM: So if my husband said that he wanted to get out of our marriage, what could he do to you...?

YM: Oh! They will take all the money and all the children. They will take them all.

MNM: What about just between you and your husband? Was there a time that he respected you more than any other time?

YM: Oh... I’m afraid there... I think there was none.

MNM: Okay. So based on what you think, the Hmong men have no respect for their women regardless of the situation, right?

YM: There is no respect at all. For example... Some women may have a little value, but most of them were just like how the white men treated the black men.

MNM: They were treated very low like that, is that right?

YM: It was that low because when it comes to eating they always eat first then they will let the women eat after. They normally ate everything so there is nothing left behind.

MNM: I see.

YM: So if someone would leave something behind in the pot, they would come around and say, “How come there is food left over here and you didn’t fill up the plate? How come there is food over here and you didn’t provide it to us?”

MNM: What about the Hmong men...? Was there anything else that they did to show us that they have no respect for us at all.

YM: They won’t tell you, but you will see that is what they did...
MNM: Yes, but what else did they do to show you that? One way is the way they eat…

YM: The way they eat was one of them and another was when they talk about something, they will not let you listen to them. If you happen to be nearby they would come out and tell you to get out to the mountain, our way of telling someone to stay far away.

MNM: They thought we had no ideas, the words that we speak have no meaning at all, right?

YM: They won’t let us hear the important stuff. They won’t let us hear them at all. The only time that they knew we existed was when they wanted more money.

MNM: So among you and your husband, the woman kept all the money, right?

YM: The woman is the one who kept the money, but for others, it was the men who kept all the money. This is not always the situation… It’s up to the one who kept the money to see if he or she is good with it or not… Some, the woman keeps the money, but she does not know how to handle it. She spends on anything she sees regardless of the value to the family.

So the husband won’t let his wife keep it either.

MNM: Okay, did you remember the time that you escaped from Laos to Thailand…? When was that?

YM: It was around September because we had found a rice field and we pick up the rice and we mixed it with water.

MNM: Okay, during that time had General Vang Pao left the country yet?

YM: He had already left the country.

MNM: Okay. When you think back to the time that you were living in the camp, what did you remember most about it?

YM: When I was living in the camp, all I can remember is working.

MNM: Where did you work?

YM: I worked for the Thai people.

MNM: Was that far away from the camp?

YM: Yes, it was far away. They came and picked up us in their vehicles.
MNM: So they came and picked you up… Were you the only woman who went with other men or were there other women too?

YM: There were many women. There were women mixed with men.

MNM: How much did you get paid per trip?

YM: We were paid ten bucks per day.

MNM: Ten bucks, you worked the whole day for them? What exactly was the kind of work that you did?

YM: We pulled out weeds. We picked corn and cotton.

MNM: Oh! Ginger too?

YM: Yes.

MNM: During that time, did they allow people to get out of the camp?

YM: We had to sneak out.

MNM: You snuck out, but you were picked up by the Thai people, right?

YM: Yes, there were some who came to pick us up while others would arrest us.

MNM: [Laughter] They made a lot of money.

YM: Yes.

MNM: They made money when they arrested us and they also made money when they let us go too.

YM: This is because there were some that wanted more labor help from our people so they came and picked us up while others, they waited along the road to arrest us.

MNM: Yes. While you were living in the camp, what was it like to live in there?

YM: The life back in the camp was a very hard struggle. There was no money at all. We worked very hard all day long and would get only ten bucks. We were starving because there was not enough food to eat. It was very hot and we were desperate for a glass of ice water, but there was none available.

MNM: Were there places where you could farm?

YM: There were many places, but they won’t let you do it.
During the time that you prepared the land and planted the crops, then they allow you to go out and work on it. But during the time that the plain was ready to be harvested then they closed the gate and won’t let you go to harvest it. This means they got to harvest all of your hard work.

**MNM:** Oh… So they got it all.

**YM:** They got the fruit of our labors.

**MNM:** They were very smart and bad.

**YM:** They allowed you to go out and work on the farm, but once it is ready to be harvested then they closed the gate and wouldn’t allow anyone out so they could harvest the fruit of your labors.

**MNM:** I see. So while you were living in the camp, were there houses available for every family?

**YM:** We had our own house.

**MNM:** Did you have to build it yourself or was it already built by someone else?

**YM:** We had to build it ourselves. There were some houses that were built by them, but others were built by us.

**MNM:** I see. So, how long were you there at the camp?

**YM:** We were there for two years.

**MNM:** Only two years?

**YM:** Yes.

**MNM:** In your opinion, was there anything good about the camp at all?

**YM:** No, there is nothing.

The time back there, was only temporary for us while we were waiting to see what else would be coming up next.

**MNM:** So back in the camp, in your opinion, there is nothing good at all. There were only bad experiences, right?

**YM:** Yes.
MNM: So, while you had mentioned that you were waiting in the camp… Were you waiting to go out to other countries? Were you waiting to go back to Laos? Or what were you waiting for?

YM: We were waiting in there to go out to other countries.

MNM: Okay, while you were in the camp… How did you live?

YM: While we were there, we were very poor and struggling… There is nothing good about living there.

We were struggling for food while we were there.

MNM: But it seems like they were supplying food for the people too, right?

YM: Yes, they did, but it was very small, not enough to eat at all.

MNM: They gave you a very small portion… They gave it to you based on the number of people in your household, right?

YM: Yes.

MNM: What kind of food did they supply? Did you remember?

YM: They brought pumpkin, sometimes they brought fish, meats such as chicken, and pork so if we had about four or five people then we only received this one big piece of meat.

MNM: Were you supplied once a month or once a week?

YM: They only supplied us once a month.

I don’t remember well… Was it monthly or weekly?

MNM: So they gave you that small portion and expected it to last the whole month?

YM: Yes. When they supplied us from America, there was much more, but the Thai people took away a huge portion of it so whatever was left over then they divided that among all the people.

MNM: If they only supplied that much, what else did you have to do in order to provide enough food for the family?

YM: We had to work for money so we could buy a little salt, msg (piaab vaam), some hot peppers and then we went to pick up some pav bong so we could boil it to eat.
We went to pick up weeds around the house so we could boil them to eat.

**MNM:** If everyone was doing that then there would be no weeds left, right?

**YM:** We pick and pick and pick…

**MNM:** Did you pull them all the way from the ground?

**YM:** No, we tore the root.

**MNM:** What about back in the camp…? In your opinion, how much difference was there in term of treating people with respect between the women and the men?

**YM:** When we were in the camp, because we did not have any country, I think we were all equal.

**MNM:** So everyone was equal, right?

**YM:** Yes.

**MNM:** Okay, while you were back in the camp, were there any opportunities to go to school?

**YM:** Yes, that opportunity was available there.

**MNM:** Was the opportunity available to both the women and the men?

**YM:** Both women and men went to school in the same building.

**MNM:** Were there any women attending school?

**YM:** Yes, there were.

**MNM:** So back then, there was no need to pay money at all, right?

**YM:** There was no cost at all.

**MNM:** When you were going to school, were you studying the Hmong Language, Laotian Language, or what language?

**YM:** I studied the Hmong [English] Language. We studied the things that we needed to know before we come to this country such as a chair, a book, bicycle, etc…

**MNM:** A chair, a book, bicycle… What about your teachers, who taught you?

**YM:** They were the Thai teachers.
MNM: Were they all Thai teachers?

YM: The Thai teachers that knew a little bit about the English Language, but there were some American teachers that came from this country too.

MNM: Were there Americans in the camp?

YM: There were some, but very few.

MNM: I see.

YM: So there were mostly Thai teachers.

MNM: Yes.

YM: The Thai teachers that know a little English such as I love you, I go, I come… Probably those Thai Teachers only knew as much as I do now.

MNM: Maybe that is right, but during that time, they knew some English, right?

YM: Yes.

MNM: Were there any Hmong who taught? Among all those teachers, there were no Hmong teachers?

YM: There were no Hmong teachers at all...

MNM: Oh! Okay, what drove you and your family to make the decision to come to this country?

YM: It was because we could not turn back anymore. If we would have turned and gone back to Laos then we would surely have been killed by the Vietnamese soldiers.

The reason we left Laos was because we could not stay any longer, that was why we moved.

MNM: So surely, you didn’t want to go back to Laos, right?

YM: Sure, we wanted to go back, but there were people waiting for you back there and if you go then you would die. It’s not because we don’t miss our country, but we just can’t go back there.

MNM: So even in Thailand, you didn’t want to stay, right?

YM: Thailand is not our place to live. Thailand was only a temporary place to get together while we were searching for where to go next…
**MN:** So you made the decision to come to this country based on… There were some who did not… There were some who made the decision not to come to this country… Were they just staying there or what?

**YM:** Those that made the decision to stay there, they decided not to come to this country and waited there hoping to go back to Laos… Those were the one who did not have any problem with the Laotian government.

Those were the ones who moved out because everybody did. If they would have gone back, there would not be any harm done to them.

**MN:** The men were soldiers, right?

**YM:** They were only soldiers, not the kind that the Vietnamese soldiers really hate.

**MN:** Okay.

**YM:** They were not the leaders, they were those people who only work for money.

**MN:** So you thought that your family was the kind of family that they hated and that if you would have gone back, your family would be killed?

**YM:** They would have searched and killed us all.

**MN:** So your husband, or your brothers, what kind of work did they do to make those people, the Thailanders, and the…?

**YM:** They were the leaders, those that ordered the soldiers to go to war and defend the country for them. They did things such as ordering the soldiers to go to the battlefield and fight. If you win, then you would be the leaders. They hated those leaders. One other thing that they really hated about us was that my brother knows English very well and the Americans came to us more often.

**MN:** Which brother?

**YM:** It’s Kim.

**MN:** Oh! Uncle Kim, oh… He knew English back then too?

**YM:** He knew English so every time the Americans came they stayed at our home or camp.

**MN:** I see.

**YM:** My brothers were the top leaders too.
YM: So he went and ordered the soldiers to go and fight to get our country back to us. They were the big leaders such as the head of the gang. The biggest gang leaders.

YM: How old were you when you came to this country?

YM: When we came to this country…

YM: You came to this country in 1991, right?

YM: No… It was 1981 instead.

YM: Let’s see… 1981, okay.

YM: 1981, so let’s say for all this time that I had been in this country… I am 65 years old now so I must had been about 40 years old back then.

YM: Okay, after you arrived in this country, what were the things that were the easiest for you to learned and adapt to?

YM: There was nothing that was easy to learn at all.

Everything was hard because I was not the educated kind of person. I am the kind of person that uses my eyes and knowledge to make my living.

YM: What were the things that were the hardest things to learn?

YM: Learning the English Language was hard and learning to drive was also very hard.

YM: So learning to speak English was hard, learning to drive was hard, and learning to get around the house was also hard, right?

YM: When we first arrived in this country, learning to move around the house was very hard. We did not know when to pay the rent, when to pay the utilities and we did not know when those bills were due.

We did not know how to write down the date so we just took the money to the agency and if they did not take it then we just brought it back.

YM: Oh, dear. So how did you finally know…? How did you finally learn?

YM: I started to learn when I brought them the payment, they told me that it was way past due then I realized that oh…!

Now, this is due so next time I counted until that date then I go back and pay them.
MNM: What about the stove, refrigerator or other similar devices?

YM: The stove, I did not know how to use it at all…

MNM: What about the bathroom?

YM: Regarding the bathroom, we knew, but the stove, we did not know how to use it at all. Sometimes the stove did not light by itself so I had to light it and boom! It came on!

MNM: [Laughter]

YM: It burned some of my hair. [Laughter] So now I knew… Next time I just had to be careful.

Sometimes, I had to wear the protective gear before I turned on the stove.

Don’t turn on the stove yet, let’s look for the lighter first.

MNM: Oh, boy… What about driving the car…? Who taught you how to drive?

YM: Who? Whoever that is available.

MNM: What about the children? What did you think was the hardest thing for them to learn and adapt to?

YM: I don’t know, but maybe it was their schoolwork that was hard for them. This is because all they did was go to school.

The one that work hard on their schoolwork, then they made it, but the lazy ones were the only ones who did not make it.

MNM: What was the one thing that you considered the easiest for you to adapt to in your new life in this country?

YM: There was nothing to help to make it easy at all. I had to make a decision and do it…

MNM: What about when you first arrived in this country…? What were the few things that you felt you must know quickly in order to make your new life in this country much easier?

YM: One of things was to learn how to use the money in this country. So I had to learn which one to use to pay for food etc…

MNM: Okay. What if you gave them the wrong change? They could have taken all your money quickly, right?
YM: They had taken most of it already.

MNM: That was how we learned, right? [Laughs]

YM: They just took our money as we gave it to them. After you left then you realized that they had taken all of your money and had not given back the change. Then we started to realize oh... This is how much it costs for this item and so on... That is why they did not give back our change.

MNM: So if you ran across the bad person then he/she would take all the money, right?

YM: Yes! When we first arrived into this country, we did not know much about anything and we thought that the Americans are all good-hearted people. We even thought if you gave them your money, they would not take the change. But our teacher told us—Don’t even count on it... Americans are the worst people to be trusted.

MNM: Oh! So there were teachers that taught you all this too, right?

YM: Yes.

MNM: Were they the only ones who taught you all these things?

YM: The American teachers, they told us that those people that cheated us were very happy because we did not know anything.

So they taught us how to shop and look for that price tag and know how much money you had in your hand before going shopping. So when it comes to the checkout time you will know exactly how much they charge because you know how much it cost by looking at the price tag.

MNM: Yes.

YM: They gave me the receipt for the total after they rang it up on the machine then I brought the receipt home to show it to someone who knew more about this than I do.

MNM: So when you were attending school, did you finish it? Did it cost you anything?

YM: No, it did not.

MNM: It was free, right?

YM: No, it was paid for by the welfare department.

MNM: Did you go to school every day or only...?
YM: I went to school everyday and the Welfare Department gave us money for the bus fare so we could attend the class.

MNM: Oh!

YM: And if you were absent from the class then you had to take a note from the teacher down to the Welfare Department.

MNM: Oh, okay… So everyone attend these classes, right?

YM: Yes.

MNM: So this was something that was really helping our people out.

YM: When we were going to school, we didn’t really study anything at all. It just the basic stuff like I get up, I wake up, etc…

MNM: Oh, so what else…?

YM: We learned how to speak…

MNM: So you learned how to write, right? Learned how to shop… What about the people who came before you that knew more about these things?

YM: There were very few of them.

MNM: Then you were the one who first came to this country, right?

YM: Those that came before us only knew as much as we did. They only knew enough to help themselves out. Sometimes they took us to the hospital and that was it.

MNM: Yes.

YM: Those that helped translate at the hospital, they knew more so the hospital used them to help others.

MNM: What about those Hmong that came later to this country…? Do you think their lives were much easier because there are people who had come earlier and knew what to do?

YM: Yes.

MNM: Okay. What do you think about all the knowledge that you had attained back in Laos or our old country, has that been helpful to you in this new country?

YM: We couldn’t use it anymore after we came to this country.
MNM: I see.

YM: We are using the new things now. Back then we used our strength and our wisdom, but over here we have to use the letters and the numbers.

MNM: I see.

YM: So there is a huge difference…

MNM: So you have to learn the new ways, right?

YM: Yes, we have to learn all of it.

MNM: Okay. What about the life in this country, do you think it is better or worst for the women?

YM: After we came to this country it’s much better for the women because they had the same rights as the men.

MNM: Yes.

YM: Regardless of what kind of meeting or feast, both the women and the men could attend and eat together.

MNM: So then the life in this country is much better for the women, right?

YM: But now the men were complaining that this is not good for them.

MNM: Why do they think that way?

YM: They said that now the women are equal to us, some of them could speak better than us, and now the police are on their side too so they are losing everything. Because of this freedom, the women want their own way and to do whatever they like so some of them had committed adultery.

MNM: I see. So in this country the women were the quickest learners, they could attend any meeting with the men and they had the same equal rights as the men did…. It must be devastating for the men, right?

YM: It is very hard for the Hmong men to adapt to it. Back in Laos some of the men claim to be leaders, but some of them didn’t even know how to read and write. So after they came to this country, the women could speak much better so the men were ashamed of themselves and some of them stay way back in the corner. They were thinking how come these women who did not even qualify to do our laundry back in Laos, but how come now they can do better than us? So the men were ashamed of this.
MNM: They must be very jealous, right?

YM: They could not speak nor do anything about it.

MNM: The men were shy and did not try to talk at all that is why they were not as good as the women. What about you? Do you consider this country to be your home country or are you still considering that Laos is your home country?

YM: Oh… It will be the best thing for us if we could have our country, Laos, back which it was our home country. This country is not ours, it’s theirs. We just came to live here.

MNM: Are you a U.S. citizen?

YM: Yes, I am.

MNM: What is your opinion on that subject, do you think that becoming a U.S. citizen has any value for us?

YM: I don’t know, probably…

MNM: What made you decided to become a U.S. citizen?

YM: I heard others were doing it so I did it, too.

MNM: But you had to go to school for it. It was not easy, was it?

YM: That is why I’m saying that when I heard others were going to school for it, that is why I did it too. It’s not like back in our country that only a certain individual could go to school. Anyone who wishes to attend the class can do so.

MNM: Okay, after you had become a U.S. citizen, have you gone out to vote?

YM: I just received my certificate so I don’t know exactly when and where I need to go to vote.

MNM: Okay, Okay… What is your opinion about the Hmong that ran for office with the Americans in this country? Those that wanted to become leaders and work for the community.

YM: I think that they are the very highly educated and that is a good thing for them too.

MNM: In the past there was no one who tried to run for office like that at all, but now there are a few of them even including some women too.

YM: It looks like they are very capable and that is a good thing.
MNM: Yes. What about back in Laos, have you listened to or heard of other news from other countries such as different news stories around the world?

YM: There is none, I had not heard about them at all.

MNM: I thought you had the radio too when you were back in Laos.

YM: We only had radio for not that long.

There was news on the radio about wars in other countries like that too.

After the Vietnamese had the radio, then General Vang Pao also had it too.

MNM: But that only…

YM: It’s the news on the radio…

MNM: I see.

YM: No, it’s not the newspaper.

MNM: So the broadcasting of the radio only happened not too long ago, right?

YM: It only happened when… It was when General Vang Pao received his honor.

MNM: Regarding the broadcasting on the radio… If you listen to it then you will know about the news that is going on around our country, Laos, right? How do they get the information to others because everyone lived very far apart?

YM: We had to buy the radio, we bought the radio…

MNM: During the war, did they use the radio to broadcast information to others?

YM: They use the radio to broadcast because they each had one with them.

MNM: So if they wanted to send the message then they would just talk on the radio?

YM: When they broadcast the message, they did it at the headquarters and all you had to do is to turn yours on and you can listen to the message too.

MNM: Okay. Was there someone who notified other towns by mail or did someone actually deliver it to them via a pony?

YM: There is none.

MNM: So everyone just listened to the radio, right?
YM: Yes.

MNM: Okay, when you hear the news about the war in your country in the radio, what was it like? How did you feel?

MNM: Ah, I was very worried. We were very depressed, sad, and worried because the war was moving closer and closer to us. There were thoughts running through our mind about are we going to win or are we going to lose because we are just in the middle...

MNM: Back in Laos, was there a particular person that you admired or respected?

YM: Back then… We admired the king and the leaders of our country.

MNM: Who were they?

YM: Every time the king came by, everyone brought flowers to worship the king.

MNM: King…? Which one? Lao King, Hmong King or which king was it?

YM: It was the King of the Laotians. Regardless of who it was, the king or just other leaders coming by, we all would go out to worship them. This included General Vang Pao.

MNM: Oh! Really, General Vang Pao? Who else beside General Vang Pao? Was it only General Vang Pao and his men?

YM: Only General Vang Pao.

MNM: Among the Hmong people, was there anybody that worked with those leaders?

YM: Yes, there was.

MNM: What was his name?

YM: I don’t know.

MNM: But you also remember that you had gone out and worshiped them too, right?

YM: We had gone many, many times to receive them with flowers. We would also kill our chickens and pigs and cook them because they were the leaders.

MNM: Okay, what about in this country, what do you see in terms of women’s leadership? How has that been changed from the past?

YM: Women’s leadership has changed a lot, but I don’t know how much it has changed. But it’s all better than back then.
**MNM:** As I have asked you this question before... Back in Laos, where there any woman whom had become leaders that you knew of?

**YM:** No, there is none.

**MNM:** What about in this country, is there anyone that you know of?

**YM:** Over here, there is... There are women who have become leaders too.

**MNM:** Of those women leaders that you saw, what kind of job do they do and what kind of a leader are they?

**YM:** They are the leaders for their home, leaders for different organizations, they are all over the place including the company too.

**MNM:** After we came to this country, what are the duties that the women had done only because of their rights in this country that they could not had done if they were to stay in Laos and Thailand. What are some of those duties?

**YM:** They are all over the place, such as some are competing for other positions in the office or in the organization...

**MNM:** Yes.

**YM:** Right now, they are all over the place...

**MNM:** Including doctors and lawyers, they have become...

**YM:** Doctor or lawyer, they have the right to them all.

**MNM:** What about back in Laos or in Thailand, if you have the time to go to school for those career, could you do it because you are a woman?

**YM:** They won’t let the women to have that kind of power. I don’t think they can... Maybe underground...

**MNM:** I see.

**YM:** The highest they could go is doctor.

**MNM:** Yes.

**YM:** There was no one who had become leader among the organizations at all...

**MNM:** In other words, the kind of organization where the men had to work under your supervision, right?
YM: Regarding the women, I don’t think there were any.

MNM: What do you see in terms of the work that was done by the Hmong women to help lift up our nationality?

YM: One of the things they knew was how to make sure that we are not departing, but instead we need to work on our differences and working toward a more peaceful community.

MNM: Yes. What about the abilities of others outside of our home, what were they?

YM: Help around the house and making sure there is food on the table, but in terms of helping others outside of our homes, I don’t know what to say because I had not gone to class with others whom had done that.

MNM: Do you have anything else to add to this?

YM: I don’t have it. I don’t know what else to say…

MNM: Well, with all the questions that I asked of you, do you have anything else to add to this?

YM: In this country I think that for those people that are highly educated, that is very good for them. It’s the rest of us that do not education that it is not good. Just an example, sometimes we are so mad about something and would try to do something about it, but because we came to live in their country and it seems like there is no respect shown towards us like there was shown to other people. We always dream and think back to our old country about how peaceful we were even though we did not have the same rights as the men, but there is no one there to hate you.

We were so peaceful in our country, but in this country for those who could learn the new language, things are good for them, but for the rest of us who were struggling through, we did not have the knowledge so we had to start to learn how to read or write so it was very hard for us. We are the one who got caught in the middle. We could not turn back because everything we had was gone including our home, livestock, farms, etc. Even though we went back to our country, we would have to start all over again. Who has the strength to do that…?

It was very hard when we first got started, that is why we were on welfare. For the people like us that had to be dependent on welfare for a while, we were treated with no respect by the social workers that work at the welfare department. I wish that we could trade our places with those social workers and see how they would act in our position. I was wondering what would they think if they were in our places. I think that we would probably hate them too just as they did to us, but I don’t know how they would think if they were us. This is because our lives were falling apart. Ever since I was a small child, I never dreamt of coming to this country to beg for food like this. Maybe the life back there
would be better even though we did not have the same rights as men, but it would be so peaceful. We could farm anywhere we want without paying a fee for it. We could cut down all the trees and the bamboo in our farm and there is no one there to tell you what to do.

The forest, the entire hill and everything else are yours. There is no one telling you what to do. You could farm anywhere you wanted and all you had to do was to plant the seed and you are all set. Not like this country where you have to fertilize it and then you need to poison the weeds.

MNM: Killing the insects, right?

YM: There are going to be insects that eat out crops. When we were back there, I don’t know for sure, but many grasshoppers that ate our crops were sent by the Americans as I was told.

MNM: Oh!

YM: The Americans sent the grasshoppers out to eat our crops so that they could sell the poison to kill those grasshoppers so that they could make more money.

MNM: Yes, that is right.

YM: So we didn’t really know that those grasshoppers were sent by the Americans. Maybe they just come up by themselves.

MNM: Oh… You had mentioned that when we arrived into this country there are other people who hated us and treated us with disrespect. Why did they hate us?

YM: They don’t know about our struggling. They only thought that because their country is very fruitful so we just wanted to come and eat away their efforts.

MNM: I see.

YM: They didn’t know what we had been through and why we have the problems that we had. It’s all because the Americans sent their people to live with us and that is why the Vietnamese hated us so much that they just wanted to kill us for it.

MNM: I see.

YM: For them, they don’t know anything about this. Now, all they see is that the reason we are here is because their country is so fruitful and they thought that we are here to enjoy and take away the fruit of their labors.

MNM: Right…
YM: There was one time that I went to the welfare department to fill out the paperwork and you all did not go with me…

MNM: Yes.

YM: That American social worker told me lots of thing, but I did not realized why he said those things. I wish I had a mini recorder like yours to record the conversation so that we could listen too, but I did not have it to record. I knew what he was talking about so I can even speak a word out of my mouth. Finally I told him that I know, Americans hate the Hmong people.

I told him that I really knew that Americans really hate Hmong people. He told me lots of stuff and I don’t know everything he said, but the key point of it all was how he hated us…

MNM: Oh, dear.

YM: He told me that how come you did not go to work and why are you just keep coming to us to ask for money… That is what he told me.

But he did not know how much struggling we had been through. He did not know how lucky we are to stay alive so we could come to this country. Maybe he would still say all those things about us.

The only reason we are having this problem is because of the Americans who came to our country and caused all these problems. That is the reason why we came to this country, but he does not know about that and all he sees is that we are here to use his money and take his country and his home…. They really hate the people who are on welfare like us. For those who went to work to support their own families then the Americans said that now they are taking away our jobs.

MNM: So what do you think they wanted from us? Don’t they want us to…

YM: We stayed by ourselves, but they kept saying bad thing about us… in this country.

MNM: That is right.

MNM: Even when you go to the office, they will say, “Hey!… The Asians are here to take away our jobs that is why we did not have enough work to do… For those who are still on welfare… They say that we are beggars and why aren’t we going to work. It seems like we do not have any peace at all. The only people who have the peace are the ones who were highly educated. For the rest of us we don’t have anything at all… The house we live in all belongs to them… The garden we did also belongs to them too. We had to rent every year.
Back in our old country, we did not have to pay any money to farm. In regards to our home, we built it by ourselves. We went into the forest and cut the trees to built our home so it’s totally belongs to us. We did not have any bills such as electricity, but we have oil for the lamp and we had a special kind of wood that we used to light up our home.

We lived our lives so peacefully.

We didn’t have to pay the rent or mortgage so everything we earned we could keep.

We raised livestock and sold them to get extra money to help out our family to buy clothes and help pay the tuition for our children.

We didn’t have any bills at all.

That was really good for the people like us.

But over here regardless of how educated you are…. If you are working for somebody then they will not let you go beyond them.

Let’s say right now if you are attending school or going to fill out application. You go out and apply for a job. They will always hire their own people first so they will not hire you. So this why I saw that they are not being fair with everybody.

**MNM:** That is right…

**YM:** They did not treat us the same as their people… When we first arrived in this country we could not speak any English at all…

Just as I had seen while visiting you at your school. I noticed that even though you had raised your hand for help, but instead of helping you they rather go and help the American kid that was sitting at the corner. They did not help our children as much as others. I saw that this is not fair to all of us… I used to think that the Americans were the most good-hearted people on earth when they first came to our country.

But how come after the Americans and the Thainlanders came to our camp for only three months and we lost our camp while we had been there for ten or twenty years and we are still there? Why did the Vietnamese hate them so much? This is because the Vietnamese knew what they were like. They knew the dark secrets inside the American’s heart. This is why the Vietnamese hated them. Whenever the Vietnamese heard that there were Americans and Thainlanders at our camp them they would come and bomb us. The Americans and the Thainlanders were not there to make sure that we win, but they were there to have the Vietnamese destroy us.

**MNM:** After everything was destroyed then they moved out, right?
YM: After everything was destroyed then they moved on. They are not there to help us win the war. If they were there to help us to win, then we would have won already, but they were only there to attract the Vietnamese soldiers to come and kill us.

MNM: That is a very good point.

YM: After I came to this country and noticed how the American treated us then I started to realize that oh…! This is the reason why the Vietnamese hated and they chase the Americans all over the place and kill them. Only the Vietnamese and the Americans knew each other well. Only the Hmong people who were very uneducated… Whenever we saw one American came to our country and treated him so well, just like he is god. But the Vietnamese and the Americans they knew each other well… This is why the Vietnamese hated the Americans so much that they kept chasing them wherever the Americans go the Vietnamese would chase them and kill everything on the way, right?

So the Vietnamese… You don’t know, but one time after our camp was taken over by Vietnamese, they chased an American all over the places and they search everywhere for him including under the beds and everywhere. They rush all over the places to search for him as they are going to eat him or maybe pull his tongue out. They chased so fast all over the place to drive the chicken crying all over the house. Once we heard that they are chasing him in and suddenly they were in and out of our home, they chased him very, very fast.

Just then we heard the guns go off, bang, bang… Only a short time like an hour they had chased him into our town. Just a few short time after that, they left our town the Vietnamese already reaching our town. The children were very scared and we were wondering if the Americans were so nice, how come the Vietnamese hated them so much? But after we came to this country we knew that the Americans’ hearts were full of dark secrets. They only treated their people the best, but for other people they do not treated them equally… Just as we went to work, they will treat their people better than us. Even in school, they will treat their people better than us. Let’s say if there is conflict with your children and their kids they will say your children are the ones who were at fault regardless of who’s fault was it.

MNM: This is because they view their people with more important than other people.

YM: They saw that their people are more valuable than others. This is not good for us because back in our old country we have never been forced by anybody.

After we saw all these things so it looks like they were forcing us.

MNM: That is right.

YM: So whatever you say you need to be straight and say as it is… Don’t keep changing your words and if you keep doing that then you are just like the Americans who are liars.
MNM: That is right, so in our eyes they have no value at all, right?

YM: Or sometime we were wondering how come this guy is so smart, maybe he is not an American… Because Americans always lie…

MNM: Okay. Thank you.
