INTRODUCTION

Minnesota is home to one of the largest Hmong communities in the United States. More Hmong live in the Twin Cities than in any other urban area in the United States. Originally from Laos, the Hmong supported American troops during the Vietnam War. Beginning in 1976 and continuing in four waves until 1996, many came to the United States as political refugees. The Hmong have strong kinship and clan ties. Many who originally were resettled in other areas, chose to move to Minnesota to be close to family members and other relatives.

The elder women’s experiences included maintaining home and family while their husbands fought alongside American soldiers in the Vietnam War. They fled their farms and villages and crossed the Mekong River into Thailand where they lived in refugee camps before resettling in the United States.

The experiences of the oldest members of the community are vastly different from those who came here as children and those who were born in this country. Today, Hmong women work as teachers, lawyers, and decision makers in their respective positions—opportunities not available to them in their homeland. The youngest never experienced war or resettlement and are unfamiliar with the privations of their elders.

This oral history project chronicles the contributions and experiences of Hmong women with ties to Minnesota. Members of the Hmong Women’s Action Team, a group of Hmong women community leaders and activists, interviewed each other and their mothers and grandmothers, and in one case her daughter. They share their stories of life in the Minnesota, Thailand, and Laos. Three generations from six different families are represented in this series of eighteen interviews.

The interviews help provide a greater understanding of Hmong women’s roles in the home and community, challenges and successes in public and private realms, and across time and space.

KY: My name is Khias Yang. Today I will be interviewing my mother and her name is Sia Yang Thao. We recorded this in her house and right now it is 5:00 PM. Today is December 14, 1999. Okay, before we get started, I’d like to ask you a couple of questions about you. What was your clan name before you got married?

SY: My clan name was Yang.

KY: Okay, what is your husband’s clan name?

SY: His clan name is Vang.

KY: Vang, okay. How old are you now?

SY: 55 years old.

KY: 55 years old?

SY: Yes.

KY: Okay, how many children do you have?

SY: I have seven children.

KY: How many boys and how many girls?

SY: Three girls and four boys.

KY: Are all of your children still living with you?

SY: No, regarding my children… My oldest daughter and the youngest daughter have passed away.

SY: Okay.

SY: So right now there are only four sons and one daughter, which is you.

KY: Okay. Have you attended school before or what grade did you complete? How high, and where did you go?

SY: I had not attended school at all.

KY: You have not attended school at all?
Okay. Right now are you working?

SY: No, I don’t.

KY: Okay. At this present time, are you living by yourself, living with your sons and their wives, your daughter and her husband or living with your husband?

SY: I live by myself.

KY: Right now, is your husband still living with you or what happened to him?

SY: My husband has passed away.

KY: Okay… How long have you and your family been in this country?

SY: My family and I have been here since 1980.

KY: Okay, so you came to this country in 1980, right?

SY: It was April of 1980.

KY: Okay, where were you born? What country and what state?

SY: I don’t know much about it because my parents have passed away so I don’t know, but I asked the older folks who knew about me and they told me that may be I was born in the city of Phuam Yav.

KY: Phuam Yav?

In what country?

SY: Laos.

KY: Okay. What category of Hmong are you and your family? Are you Blue Hmong, White Hmong or Stripe Hmong?

SY: We are the White Hmong.

KY: Okay. What is your religion? Right now do you still carry the old religious belief that the old folks believed or what religion are you now?

SY: Right now, regarding myself, I have been going to church.

KY: You are going to church, so that is the new religious of believing in God?
SY: Yes.

KY: Okay, right now I will be asking you questions regarding when you were young or when you were a teenager to see what did you do.

Had you been attending school when you were a young girl?

SY: There was no school to go to, so I have not attended any school at all.

KY: Okay. What kind of work did you do as a young girl and a teenager to help out your parents?

SY: I helped them baby-sit and worked on the farm… Some things like that…

KY: Have you done anything to help out your relatives and your community?

SY: Sometimes they came to my parents and asked me to help them baby-sit and I did. I was gone for two to three days before I can come back home.

KY: What else did you do beside baby-sitting?

SY: Just baby-sitting.

KY: During that time had you anything else to help such as gathering firewood or something like that?

SY: As I was growing up and able to handle the tasks then, I had gone to gather firewood. I gathered food for the pigs and fed them.

KY: Okay.

SY: And hauled up the water.

KY: You carried the water too?

SY: Yes.

KY: Okay, good.

SY: There was no time to rest at all.

KY: What about the time when you were a teenager, did you help them farm too?

SY: Yes, I did.
KY: When you were a young girl, was there anything that your parents had taught you to do…? Something like learning how to cook, being a good person or something similar to that?

SY: I had been asked to grind the rice while my parents were at the farm. I stayed home and ground the rice, but the equipment was very heavy so I had to tie two ropes to it and pull as hard as I could to get the rice ground.

KY: Okay. What else did you do beside grinding the rice?

SY: Ground the rice… I ground the rice and I had to get up early in the morning to prepare the food for the livestock.

KY: Okay. Did they teach you how to cook?

SY: They taught me how to prepare food for the livestock, doing handicrafts, and prepare food for the family. All these were taught to me by them.

KY: Okay, Did you remember those activities that you did for fun when you were a teenager and a young girl? Those fun activities such as attending the New Year’s Celebration or other fun activities… Did you remember them?

SY: Fun activities… Other then when I was a small child and playing with other children on activities such as playing with dolls and pretended to be the mother and father. I had never had anything that I did just for fun when I live with my parents. My grandfather passed away.

KY: Okay, did you go and attend the New Year’s Celebration?

SY: Because I was still a small child so there is nothing that we did for fun even with the New Year Celebration.

KY: During your teenage years, were there anything that you dream of having or achieving when you grew up and had a family such as clothing or other things simular to that?

SY: I had those dreams within my heart, but I never asked for them from my parents. Even though I did not tell anyone about them, but deep in my heart I knew that someday when I was ready to work then I shall have them so that I can say that this is mine. That was my thought. I never asked them for those wish lists.

KY: Okay, but did you remember any specific thing that you really wanted at that time…? Such as money, clothes to wear or what were you dreaming of then?

SY: I had those dreams too. I wanted nicer clothes to wear. Even though we resided in the far country, but I was still wanting nicer clothes to wear.

KY: Okay.
SY: Those were the things I wanted…

KY: That is good. Okay, now let’s talk more about before the war, during the war, and after the war and see how did you and your family live? What were the duties of women before the war and during the war…? What did they do?

SY: These are some of the duties for the women. They cooked for the family, stayed home and did the laundry, took care of the children, farming, took care of the livestock and everything else around the house. This included doing his laundry and preparing food for him too. All the man did was to go to work and when he come home he had a nice meal waiting for him and after he ate, he went back to work. So everything around the house were the duties for the women.

KY: Okay. Did you know of or hear of other women who not only working around the house but also working for someone else outside of the house such as office work or something similar to that?

SY: Regarding that, I had never seen any particular women, but I had heard about them. I had heard that there were some that worked in the hospital and school, but I had never seen because there were only a few of them.

KY: Okay, so you had not seen or knew of any of them personally, but you had heard of them, right?

SY: Yes. I had never seen them and I don’t know who they were.

KY: Okay, before the war… Did women had the rights to make decisions with the men on what to do to best benefit the family? Did they have the right to make decisions?

SY: The women had no rights at all because in our country the men were the one who made all the decisions. Regardless of what kind of topics there were to talk about, only the men were to attend. It did not matter how talented the women were, they had no voice when it came to something like this. Whatever the men decided that is final.

KY: Let’s say if there is a woman who had a good idea and wanted to share her opinion with the men, would they accept her opinion?

SY: As far as I can remember, I had never seen something like that.

KY: Okay, what about during the war…? What about your husband…? Was he staying home with the family or was he serving at the battlefield? If he was at the battlefield, were you the one who made all the decisions when it comes to what to do to feed the family and whether to move or stay in the event that the enemy comes to town? Were you the one who made all the decisions in your household?

SY: When my husband was at the battlefield and away from home, if there was any sickness or emergencies at home then we would call upon him. They didn’t even let him come home. Maybe
they let him come home for a night or two then he had to go back. The life back there was not easy at all because we lived very close to the Vietnamese soldiers. They were only a half a day’s walk from us. When my husband was at the battlefield, he left us in town and during that time I had two small children with me. I had to carry the food and carry the children and hide for three to four days when the Vietnamese soldiers moved closer to us. We had to hide out until it was safe to come out. The life back in Laos living with the Vietnamese soldiers close by was not easy at all. There were lots of struggles for us.

KY: Okay.

SY: So when we were hiding in the jungle, there were no houses for us to live. We had cut the trees and banana leaves to make temporary house for us to live in for couple days and if it becomes safer then we could come back to the city.

KY: Okay. During that time, what was it like in terms of working to put food on the table because the men were at the battlefield leaving only the women and children at home?

SY: During that time, my husband was not home so when it was safer then I had to go to the farm and gather some food for us to eat.

KY: Okay. During that time, were there any women that were leaders and served before the war, during the war and shortly after the war that you knew of? Whether you knew their names or not, but you knew that they were leaders during that time. Did you know anyone like that during that time?

SY: No, there was none. I think there was none.

KY: Okay, what about those women who had attained a higher education status that you knew of during that time?

SY: Regarding that maybe there were some, but I did not know them personally.

KY: Okay.

SY: I had heard of others saying that there were some, but I did not know any particular person.

KY: Okay. What about those jobs that the women did to help their families to enhance their lifestyle or so that their families have enough food to eat? Let’s say they did handicrafts for sales, selling vegetables, or something similar to that. Had you done anything like that or knew of some other women who had done that?

SY: The jobs that women did to help out their families were farming such as planting corn, rice, and vegetables so that they always had food on the table for their families. They also planted vegetables for sale so that they could raise additional money to help out their families. But when it comes to doing handicrafts for sale, I don’t think that they were doing that during the war. I only share what I knew of.
KY: Okay.

SY: After we escaped was when they started to do the handicrafts for sales.

KY: Okay.

SY: It was after the war and after we had moved to Thailand was when they started to do handicrafts for sales.

KY: Okay.

SY: There were lots of struggles back then, right?

KY: Yes.

SY: Those whom did not work would not have enough to eat, right? So that is why we had to learn how to do handicrafts for sales to get some additional money to buy food.

KY: What about before the war? Let’s say were there any… including us and other families, did you know of anyone who had owned a store or a shop during that time?

SY: Yes, there was. There were many Hmong people who had stores and shops. That is not all when we were in Long Cheng, we had a store too. I had one too.

KY: Okay, so you had one store too?

SY: Yes.

KY: Okay, good. What did you sell in your store?

SY: In the shop, I sold drinks, pops, papaya sellas, I sold pho, and also I sold noodles too.

KY: Okay, when you were in Laos at the time before the war, during the war, and shortly after the war did women had any right to come to her husband and tell him that I only want this many children? Was there anything that they use for birth control to avoid having lots of children?

SY: Regarding that, I don’t think that there were anything like that at all when we were back in Laos. The Hmong women had to bear children until they are no longer able to. They never stopped until they were done.

KY: Okay. What is the one time that you think you got the most respect from your husband, your family, or your neighbors? What about the time that people gave you the least respect because you were a woman? What was the situation that you get the most or worst respect?
SY: Wow… If you are going to ask about those then it will be hard for me to answer too
because…

KY: Just answer what you knew.

SY: The time that my husband came to help me the most was when I gave birth to a child. He
just cooked a few meals for me to eat for a few days.

That is all that he did to help me because just in a few day after I got better then I had to cook it
for myself and for him. There were times that I could do it because I was not feeling well and if I
ask him then he would do it for me too.

KY: Was there a time that they treated you with no respect at all, they thought you were not
important because you were a woman?

SY: I think that in my situation… The saying that my husband that I had married all these years,
there had not been a time that he treated me really bad. There was none for me.

KY: There was none? Okay.

SY: There was none…

KY: Okay, good. Now I like to ask you to talk about the Fall of Laos. During the war and
shortly after the war when we escaped to Thailand and lived in the camp, I will ask you a couple
of questions about that time. What was it like?

At the time the country was falling, what drove you and your family to make the decision to
escape into Thailand? Who made the decision? Was it you or your husband?

SY: This is what it was all about. I just wanted to talk about what I had experienced when I
escape over because at that time they used the helicoptors to carry the people over to Thailand.
People were racing to the helicoptors to escape to Thailand so whoever reached the front line
first, they got to fly to Thailand. So the family with lots of children would never had the chance
to come. At that time my children were very young too. I had four children and one of them is a
girl. They were very young and I was thinking about racing to catch the helicoptors with others,
but because my children were very young so I was afraid that I might lose them or vice versa. If I
lost my children what good would it be for me or if they lost me, that is not good either. So I did
not care to race with other people to the helicoptors. We decided to stay, stay, stay, stay and stay
until the Vietnamese soldiers actually came into town.

The Vietnamese soldiers had arrived. Those that had become Communists, the Vietnamese had
came for them already and they told us that the Vietnamese soldiers were try to show them that
they will cut our people by the throat… Is that right?

KY: Okay.
SY: Yes. So that time, they were…

KY: At that time what about your husband? Was he at the battlefield or was he with the family?

SY: At that time we were living together.

KY: Did he came from the battlefield?

SY: Yes, he came from the battlefield. At that time the country already had fallen.

KY: Okay.

SY: Everyone had moved, but he refused to escape.

KY: Why didn’t he want to escape? Did you know why?

SY: I said that it’s okay for all the people to move on. They can move on if they wanted to, but he will stay because he thought that the Vietnamese soldiers would not hurt us. And he also thought that once everyone had moved on then maybe you might get a better job by staying behind.

KY: When you said a good job… What kind of job was it? Was it a leader’s position or what kind was it?

SY: He said that he willing to stay behind as a soldier even though everyone had moved on and maybe he might get the leadership position by staying behind. This is why he did not wanted to move.

KY: Okay. So during the time the Vietnamese soldiers were moving closer, were you afraid?

SY: Yes, we were afraid because we had heard from other older folks that the Vietnamese soldiers would kill all the men including the small boys that have balls the size of a pea.

KY: Okay.

SY: With all these rumors flying around, I was terrified because I had four sons.

But my husband refused to move on so…

KY: So he did not want to move, how could you and your family move on?

SY: He kept refusing to move so we slept that night and I woke up very early in next morning to cook and prepare food for us. After I finish the preparation, I woke him up and tell him that we need to move because everybody were gone, but he refused to move. The next morning I did the samething, but he still refused to move. We did that for about four or five days.
After about four or five days he still hesitated to move. I was terrified because everybody had gone so I thought to myself that if he did not want to move on, I will take the children and myself out of here and forget about him.

KY: Okay. Yes.

SY: At that time, he still refused to move on. It was getting dark and all the taxis were gone then I started to prepare our clothes and food for our journey. We finally moved on by foot in the dark for a long time before we reach a town that was populated by the Laotians. All the stuff that we carried with us was very heavy so I threw away most of the dishes and pans except for my children. I was holding to them and carried them until we got to the town.

KY: You had walked for how many hours?

SY: I had walked for about five or six hours before we reached that town....

KY: Okay.

SY: We were very lucky because there was a Hmong family down there because their car broke down so after they fixed the car then we rode with them to Phab Kheb. We spent a night in that city.

KY: At that time your husband was moving with you and your family, right?

SY: Yes. We were going to move regardless of what he did, so finally he decided to come with us. All of us walked to that town where we met the Hmong family that had the vehicle that was broken. We waited for them and asked them to help us to get to Phab Kheb.

KY: Okay.

SY: So we went…

KY: How long was the trip to Phab Kheb on that vehicle?

SY: We traveled for about two hours before we reach Phab Kheb.

KY: Okay.

SY: We spent a night in Phab Kheb and the next morning we heard that the helicoptors had come back to pick up more people so we rented a taxi to take us back to Long Cheng.

KY: Were the helicoptors that came back to pick more people in Long Cheng?

SY: Yes.

KY: Okay.
SY: The helicoptors had come back to pick up more people in Long Cheng so we rented a taxi to take us back…

KY: Were you and your family coming back to Long Cheng?

SY: We had to come back to Long Cheng.

KY: Okay.

SY: After we came back to Long Cheng then your father refused to move on again.

KY: After you had reach Long Cheng, what happened to the helicoptors?

SY: There was none of them left at that time. When we were in Phab Kheb, there were lots of them flying around, but after we came back to Long Cheng, they were all gone.

KY: The last helicoptor had flown away right? It won’t be back, right?

SY: It’s never coming back.

KY: Okay.

SY: So we came back to Long Cheng. We came back and stay, stay, stay, stay, and stay in Long Cheng so…

KY: After you had come back to Long Cheng, were you living in your old house or were you living in someone else’s house or who provided the food for you if there was no food left?

SY: At that time we still had some food left, so we came back and eat our old food.

KY: Okay. Were you staying in your old house?

SY: We came back to live in our old house.

KY: Okay.

So how many nights did you spend there?

SY: We had came and stay for about four or five nights too. Regardless of how much I told him, he still hesitated to move on. It did not matter how much I told him he still refused to go. We kept doing that so… At that time the Vietnamese soldiers were actually came into our town and they treated the people very bad so then we decided to move on. We rented a taxi again to take us back to Phab Kheb and onced we got there we spent two nights there.

KY: After you had come back to Phab Kheb, who’s house were you staying at?
SY: It was another Hmong’s house.

KY: Okay.

SY: At that time most Hmong were gone and whichever house was empty was where we stayed.

KY: So you stayed in Phab Khet for two nights, right?

SY: We stayed there for two nights and my husband still refused to move so he did not look for car or taxi for us at all. I had to go and look for taxi by myself and after I found and rented the taxi I came back and told him that the children and I are going regardless of if he was coming with us or not. I told him that if we stayed and if we were captured by the Vietnamese soldiers and our sons were killed, I would not be able to live if that happened to our sons. If you don’t go we will go by ourselves.

KY: Okay.

SY: I had found the car for us so he had no choice but to come with us so we all came to the camp.

KY: How long was the journey from Phab Kheb to Nas Xus by car?

SY: I don’t know, don’t know, May, from Phab Kheb to Nas Xus was at the most two or three hours.

KY: Okay. Two to three hours, so what happened after you came to Nas Xus?

SY: There were lots of people after we came to Nas Xus so we stayed at the Laotian’s house and people were all over the places.

KY: Did you have any relatives that lived in Nas Xus?

SY: We did not have any...

KY: So you did not have any close relatives that live in Nas Xus, right?

SY: We did not have any close relatives in Nas Xus at all.

KY: What was it like after you had came to Nas Xus?

SY: After we arrived there, we stayed at the Laotian’s house. We did not know anyone there and they did not know us either, but we were staying together there temporarily for two nights. At that time the Vietnamese soldiers had taken over Nas Xus already.

KY: Okay.
SY: When we arrive in there, the Vietnamese soldiers were there already so…

KY: What about food after you arrived there.

SY: We had prepared and carried our food with us. We still had enough food so we stayed there for two nights. There was a Hmong gentlemen named… That gentleman’s name… I don’t remember well what his name was… I think his name was Hang Chue…

KY: Okay, was his name Chue Hang?

SY: Yes, my husband then went to prepare the paperwork that we were going to Vieng Chiang. He went to do the paperwork that we were going to take our children to the hospital in Vieng Chiang, but my husband did not come with us. He put the children and I onto the car so we came into a city called Lav 52. Unfortunately the car was broken down there so we had to stay there for two more nights.

KY: So that time your husband was not with you, right?

SY: My husband was not with us, he stayed back in Nas Xus.

KY: Okay.

SY: So only the children and I went ahead.

KY: Okay.

SY: So we stayed there for two nights because the car had broken down there so I had to rent a taxi in Lav 52 to take me back to Nas Xus. After I came back to Nas Xus to tell my husband about what had happened. I left my children in Lav 52. My husband went and prepared all the paperwork for him so he and I came together to Lav 52.

KY: Okay.

SY: After we finished all the paperwork then my husband and I rented a taxi to take us to Lav 52 to meet our children and there we came to Vieng Chiang.

KY: When you left your children in Lav 52, who were they staying with?

SY: I left them with my auntie.

KY: So when you came back for your husband and you two went to prepare the paperwork. How did you do it in order for you to get passed through?

SY: I went to prepare the paperwork that I was going to adopt more children.
KY: Okay.

SY: But for my husband, we said that he has to take the children for medical treatment.

KY: Okay.

SY: At that time, we did not claim that we were married.

KY: Okay.

SY: This is because if we said that we were married then they will know that we are planning to escape and they will not let us come if they knew.

KY: Okay.

SY: So they will not do the paperwork for us. So we said that I was one person and he was someone else and we did not know each other at all.

KY: Okay.

SY: We pretend like we don’t know each other at all.

KY: Okay.

SY: We refused to admit that we knew each other.

So we came and there were lots of gates that we had to go through. We had to show our paperwork to the Vietnamese soldiers at every gate before they let us pass by. We finally arrived in Vieng Chiang.

KY: So after you picked up your children in Lav 52 then all of you went toward Vieng Chiang, right?

SY: Hmm… Hmm… We had to pick up the children there then we came to Vieng Chiang.

KY: Okay.

SY: When we arrived in Vieng Chiang, we stayed there for two nights. We spent two nights there so…

KY: Who’s house did you stayed in?

Where did you stay after you had come to Vieng Chiang?
SY: We had some Vang uncles that had bought a house and lived in Vieng Chiang so we stayed with them.

KY: Were they still there?

SY: No, they were not there.

KY: They had already moved, right?

SY: They had moved.

KY: Okay, so you spent two nights there and what happen then?

SY: We came and spent two nights there before the Laotian came and talked to us so we hired those Laotians to take us across the river into Thailand.

KY: During the time that you were crossing the river, was everyone on board? What about your belonging, were they with you or you had to leave them behind?

SY: When we left the house we took everything with us, but when we were boarding the boat, there were about 20 of us on board and we were told by the Laotian that they would make another trip for our belonging, but they never bring us our belonging.

KY: The Laotian delivered you to Thailand, but they did not ship your belonging to you, right?

SY: After they shipped us across the river, then they never shipped us our belonging so we just forgot about it.

KY: So all your belonging were gone, they were kept by the Laotian, right?

SY: They kept it.

KY: Okay.

SY: They kept all of it.

KY: Okay.

SY: So we came and after we had reach the shore of Thailand, then the Thai people came to us and brought us food to eat.

KY: Okay.

The Thai people brought us food to eat and they took us into their houses to live until…
SY: As I remember and I figured that when we came to Thailand it was about May or June of 1975.

KY: Okay.

SY: As I’ve seen, but did not know exactly what date was it. When we get to Thailand the Thai people brought us food to eat then they looked for a vehicle to bring us to the camp, Nong Qhais. In Nong Qhais it was so flat and there was no bamboos or trees anywhere at all. So we found a few sticks and tied them together and pull the tarps above them to make tents. So we just live as it is. We used our rugs (lev) to put over the grass and when it rains we can see the rugs were rising and rising, right.

KY: Yes.

SY: For those that lived in the apartments, they did not had much problem when it rains, but for us who lived in the tents we were really struggling because when it rains, there was no place to hide except the restrooms…

KY: Okay.

SY: We had to hide in the restroom until the rain stop then we came out and stayed under the trees or something like that…

KY: Okay.

SY: When it rains, it usually rains at night so we had to kept hiding in the restrooms until the rain stops then it was daylight again. Then we came out and go back into our tents and stayed there under the trees. We lived like that for a period of time so…

KY: Roughly about how many days or how many weeks?

SY: We had lived like that for about two months.

KY: During that time, what was it like in terms of providing food for the family?

SY: During that time, the Thai people did provide a small portion of vegetables and rice for us to eat too.

KY: Okay.

SY: They gave us a little bits of foods to eat too so if that is not enough then we… They came and setup shops near by us too so we went to buy additional food too. That is how we lived. We stayed that we for two or three months then they started to build another camp called Vinai.

KY: But what about during those two to three months, did you have a house to live in?
SY: No, we did not. We lived in tents as I mentioned above.

KY: So back in Nong Qhai, you had to live in those tents because there was not houses for you to live, right?

SY: There was none because when we came to live in Nong Qhai, there were lots of problems for me and my immediate family.

There were lots of problems because there were lots of Hmong people whom had escaped from Laos. There were lots of people so we had to live very close to each other. Once we get there then we went to get some bamboo sticks to hold the tarps so that we could live under it. We just lived, ate, slept and just lived like that for a period of time.

KY: So during that time, you cut the woods to make tents to live in and you lived like that for two to three months, right?

KY: I did not remember that we were down there for two or three months or maybe longer then that, I just did not remember. But when we were down there we were really struggling and unfortunately the house that we lived in was very small. I had just enough to cover one bed.

KY: Okay.

SY: So we just had to stay like that and there we lived...

KY: Was there opportunities for you to work to get additional food or money? Did you look for places that you could farm or work?

SY: No, there was none because we lived inside the camp.

We had to take whatever amount of food that the Thai people gave them to us because we lived inside of the camp.

KY: Okay. Were there places that you could go work?

SY: No, there wasn’t.

KY: Okay.

SY: Even though we wanted to work, but the Thai people won’t let us. We were locked into the camp so how could we go?

KY: When you were living in the Camp Nong Qhai, was there any problems within your immediate family?

SY: If we are going to talk about those problems then my family had faced lots of problems.
KY: Can you tell us more about those problems and see what were they and why did they make your life so difficult?

SY: When we first came into Nong Qhai, we lived in those small tents that I talked about. My youngest son... My third son, he could not pee at all. All he could do was drip small white urine. It was like this until we took him to the hospital and had them perform surgery on him. But before we went to the hospital, I was very worried about my son so I had to look for all kinds of medication to help him. I went all over the place to search for medication for my son and there were thorn fences that were as high as we are so I was scratched all over because I wasn’t aware of them.

After all that I had done, they made no differences so finally I took my son to the hospital.

KY: So did you take him for surgery?

SY: Yes, they had to perform a surgical procedure on him before he got well again. After my third son gets well then we came home. And then my first son... My first son...

KY: The oldest son?

SY: Yes, my oldest son. There were lots of Thai shops around us and they use the carts to carry those big water bottles. They holds up to five or six big bottles of water in them.

They pushed the cart to run over my son and he was totally passed out for awhile.

KY: Okay.

SY: I rushed him to the hospital and once we get there he was still passed out and there were no doctors around either so we gave him some urine right there.

KY: Okay.

SY: There was nothing that we could do, but after we poured the urine down his throat then he woke up again...

After he drank the urine then he is well awake again so I took him back home and he was okay then.

KY: Okay.

SY: So after that they started a place where you could watch television right across the street.

KY: Was that a house with a TV?

SY: It was a Thailander’s house. It belongs to them. That house had a TV inside, but they did not call it TV, they called it thaus lab thav.
KY: Okay. Was that the first time that the Thailanders had a TV inside of the camp that you seem of?

SY: I don’t know if there were more of them, but there was only one inside of that house.

KY: Okay.

SY: The Hmong kids were rushing to see it as it’s getting dark.

KY: Okay.

SY: So this time, my oldest daughter also ran to see it too.

KY: Okay.

SY: She wanted to run over and watch it... She wanted to run over and watch the TV, but I told her no. I kept telling her no, no, and no... As my words were just coming to an end, she started to ran toward the house so I ran after her. So as I went after her...

KY: Oh... Okay.

SY: As I was chasing her and just as I’m reaching the side of the road, there was a car coming. It went right by my daughter and slightly hitting her and she felt down to the ground.

KY: Okay.

SY: So I ran to pick her up and noticed that she had pee inside her pants.

So... I was very, very and very afraid. I thought that I had lost her because of the accident.

KY: Okay.

SY: So I carried her home and then she...

KY: Did you take her to the hospital?

SY: No we did not. We rushed her into the house and after we got there we notice that she was okay. I think that the car went by so fast that it blows away my daughter as she was coming toward the car and that is why she went down into the ground. But she is okay. A couple days after that my second son went to play with another Hmong boy and they had a fight and my second son fell over too.

KY: Was he hurt?
SY: He was hit in the head and he was bleeding so there were lots of problems like that. A few days after that my son, which is my fourth son…

KY: The youngest?

SY: Yes, the youngest one. He just started to walk, but he was very quick. The houses that we lived in were very small and very close to each other and as my son steps out… At that time my brother-in-law and his wife lived near by us too so all the older children had gone to their place to play. After I noticed that my youngest son had gone out, I rushed to look for him. I rushed to my brother-in-law’s place, but he was not there so I rushed back into our house, but he was not there either. So I turned around and rushed back to their house and as I was coming into their house the older children had bumped him so he fell into the fire. My brother-in-law was boiling a big pot of water in the fireplace too so as my son was falling into the fire the pot of water fell down and poured over one side of his head to his arm and his body. He was buried with ashes so I ran and grabbed him and took him back into our house and started to clean him off with water. After I washed him then…

KY: So he was burned all over right?

SY: Yes. So I started to apply some toothpaste over the burned area and thought that maybe the burn was not that serious so I did not take him to the hospital. So he cried non-stop for over ten days and ten nights and unfortunately my husband was sick during that time too and he had went to stay at the hospital so he had no idea what had just happened back at home. He did not know that his youngest son had been burned at all because he was sick and sleeping at the hospital.

KY: Okay.

SY: So my child was burned and I had to carried him for over ten days and ten nights on my back inside of our small home, the size of our bed. I had not slept for over ten days and ten nights and my child also cried for over ten days and ten nights. Regardless of what I did, the burn would not heal. I tried different kinds of medicine, I picked up some green leaf (zaub iab) to patch the burned area, but it did not work either. I tried all kinds medicines, but they did not work at all, until his heat was puffing with liquids.

It did not matter what kind of medications I used to patch the burned area, they did not help at all. I tried applying to the burned area two to three bottles of penicillin (tshuaj kua mis) and that still did not work. So finally I took him to the hospital. After we reached the hospital, then the doctor washed him with some water and then the doctor apply the medication on him and then we came home. That night my son did not cry at all and the wound was healing. Right now one side of my son’s head that was burned has a spot that has not healed. On one side of his arm, you could tell that he was burned before because it was wrinkled.

KY: Okay.

SY: That was how it was. Before all these problems occured, whenever I cook, all the rice was turning red.
KY: Oh...

SY: So I did not realize that these problems were going to occur, but they just happened to us.

KY: Was that the sign to let you know that there might be problems?

SY: Yes. During the time that my son was burned, I had to carry him all the time so I did not have time to go and see my husband at the hospital at all.

KY: Oh...

SY: So my husband was very mad at me because he thought that I did not want to go to see him, right...

But he did not know that my son was burned and how bad he was hurt. I had to take care of my son for ten days and ten nights so I never had a chance to go to sleep at all.

These were the problems that I had to face when I was living in Thailand. It was this much so I think that...

KY: Okay.

SY: So when I think of my struggles that I had in my life—There were lots of struggles, I was wondering should I escape or stay behind with the war around us? I was thinking about how much of a struggle it was when I lived in Thailand and the problems that my children and I faced. I thought to myself that as a person in this world if you had not raise a child or had not taken care of a burned child then you should not die yet because you had to experience it to know what it was like to be struggling.

Yes, because that’s how much I had struggled in my life.

KY: Yes, you have had lots of struggles, right?

SY: When I think about my struggles, I think that as far as I could remember while I was living with my parents, I had already struggled all the way up until now. I never had a time that my life was free of struggling or I never had any peace time in my life.

KY: Okay.

SY: That’s it.

KY: Yes. What happened after the time that you live in Nong Qhais, did you move into another camp or another city too or you remained in Nong Qhais until you came to this country? If you had moved to other city, then who makes all the decisions and how did you get to the new city?
SY: Yes, you had asked me that way and I will answer you later. I like to say a few words about what it was like living in Nong Qhais because we were locked into the camp and there were lots of people and lots of cars running around the camp. There were numerous cases about children who were ran over and killed by those cars so I was very scared. For my children, I did everything I could to protect them, but these problems still occurred so I think that by just living in Nong Qhais was already the problem for us. That was another reason why we did not want to live in Nong Qhais.

So at that time they had already started to build another camp named Vinais. My husband and I thought that because of all the problems that we had while we were living in Nong Qhais, maybe let’s take our children and move to the new camp because all of our relatives were living in Vinais at that time. So let’s take our children and move to the Camp Vinais. We had to pay the Thai people to sneak us out at night to escape to the Camp Vinais where all of our relatives lived. We went there to follow our relatives. But after we had come into the Camp Vinais there was no house for us to live either so we just used the tarps to wall the bottom of the house (qab lawj) and stayed there. We had to stay that way until someone moved to America then we could move into the new vacancy.

KY: What about after the time that you had arrived into the Camp Vinais, did you remember what it like to live there in terms of providing food for the family? Did the Thai people provide the food for our people or not?

SY: While we were living in Vinais, the food that we received maybe the Americans or other countries had contributed money to help so they did supplied us with a small portion of food to eat. But they gave us a very small portion and that was not enough for us to eat so we had to look for work with the Thai people. Someday when we had a chance we would go out and work for the Thai people to get some additional money to help out our family. That was how we lived day to day and month to month.

KY: Did your family ever had a very difficult time when you were living back in Vinails?

SY: Yes, we did. There were not enough foods to eat, we had no money to buy foods, and that is not all, the children were very young. So regardless of how bad you wanted to go out and look for work to do, I had to stay home to baby-sit my children because there was a lake very close to us called lake Ber (Pas Npawv). I wanted to go to out and look for work to do, but I had no one to baby-sit my children because I was afraid that they might go and play at the lake and they might drown. If you stay home and watch over the children then there will not be enough food to eat for the family so the life back there was very hard for me. The children were very young and regardless of how you tell them they wouldn’t listen. Once they were out of my sight then I started to look around for them and I found them at the lake so I took them home and once we got home, they would turn around and go back to the lake just like that. I chased my children all day long so there was no peace for me when we live in Vinails.

KY: What about your husband? Was he working to help you or was he helping you to baby-sit?
SY: Yes, during that time my husband went out to work too. If there was a meeting within the relatives or community then he usually went to attend and help out others. If he stay around the house then he did help me out, but when he was not home then everything else were fallen back upon me.

KY: Did you remember the time that you came and lived in Bang Vinais? Did you know how long were you there in the camp?

SY: I don’t think I remember because I did not know how to read or write so I did not remember.

KY: Roughly about three or four years…

SY: Maybe if my husband was still here then he might remember, but he had passed away so I don’t remember about how we were living in Bang Vinais.

KY: Did you remember what year did you and your family move from Nong Qhais to Bang Vinais?

SY: Yes, I think that was the year 1975.

KY: Was it 1976 instead? Maybe it was the beginning of 76. Were you moving to Vinais in 1976?

Then you must had lived in Vinais for roughly four years right? This is because you came to America in 1980, right?

SY: Yes.

KY: Okay, so you came and lived in Vinais for four years, right? Was there anything that you have seen that was good about the camp for you and your family? What was good or bad about it for you and your family.

SY: Huh! The only thing that could be considered as good was… if there was enough food to eat so that the people did not had to go outside of the camp to work. Then it’s good, but that was not the case. When I think about the time that we live in the camp, I don’t think there was anything good about it at all. This was because there was not enough food to eat by just staying in the camp so that is why we had to go out and look for other things to eat like bamboo shoot and other foods. We were very scared of the Thai people because they treated us very bad, they had hit and assaulted our people and sometimes kill some of them so we were very scared to go outside of the camp. We risk our life each time we go outside of the camp and look for those foods to eat.

KY: Did the Thai people have compassion for the Hmong people or didn’t they? Did you know anything about it?
SY: I don’t know what other people think about it, but in my opinion they did not have any compassion for our people at all.

KY: Okay.

SY: Because we were the refugees who came to live in Thailand and the Thai people hated us very much.

KY: So the Thai people treated us with no respect, right?

SY: Yes, the Thai people had no respect for us and they hated us. They treated us very bad. For me I was so afraid of them so I did not go out at all and they had not done anything bad to me, but I had heard of others that had experienced those situations.

KY: So basically, on what you knew and experienced, there was nothing good in the camp at all, right? There were only bad experiences, right?

SY: Yes, for me there was nothing good about the camp at all.

KY: When you were living in the camp, what about the rights of people? Were they treated equally regardless of if they were women or men? Do they had equal rights?

SY: It was exactly like back in Laos, there was no differences at all.

KY: So the men were the one who made most of the decisions, right?

SY: Yes, the men were the one who made most of the decisions.

KY: Okay. Right now, I like to ask you to talk about when you come to this country, America and see what was it like for you and your family or what was the life in America like? Who made the decision for you to come to America, can you tell me about it?

SY: The decision were made by both of us, we made the decision by ourselves. We thought that the life in the camp was very hard because you could not go anywhere at all and since we had left our country living in half way. We did not know what the future going to be like by living like that so we thought that we should take our children to America so that they could had the education like everyone else. This will made their life much easier for them. This is why we decided to come to this country.

So we want for the first interview and we failed because we added his brother’s two sons with us. The reason we added them with us was because their mom and dad were left behind in Laos so we were going to take them with us to this country, but we fell behind because of this. We went back and applyed the second time and this time we did not include his brother’s two sons. We went for the interview on the second time and we passed it so we took our children and came to this country.
KY: Okay, how long had you been in this country? Did you come to this country in 1980 like you mentioned before?

SY: Yes.

KY: So how many years had you been here?

SY: We came in 1980 and right now is 1999 so how many years was that?

KY: So you have been here for nineteen years.

SY: Yes, for nineteen years.

KY: How old were you when you first came into this country?

SY: I did not remember at all.

KY: What year were you born?

SY: I don’t know what year did my mother and father gave birth to me, but the paperwork that we had to come to this country says that it was 1944.

My birthday was January the second of 1944.

KY: So if you were born in 1944 and right now is 1999, then you are 55 years old, right?

SY: Yes.

KY: So if you came to this country in 1980 then you have been here for 19 years. This is because you came to this country in 1980 and you were born in 1944, and right now you are 55 years old so the time that you came to America, you were 36 years old, right?

SY: Maybe it was like that. The people who were not educated like me it’s hard….

KY: What about after you had come to this country, what were the things that you thought were the easiest for you in this country? Were there things that were easy and were there things that were hard for you and your family?

SY: Oh… Those that were easy were not that simple and those that were hard were very hard too because after we came to this country…

KY: After you came to this country, what were the things that you considered were easy for your family and what were the things that you considered were hard for your family?

SY: After we came to this country, the things that were easier for us were that… Water and fire were right there ready for you to cook and you don’t have to go out and gather firewood or pick
up water like we were doing back in Laos. But when we first came to this country, we lived in their house and it looks like we were locked into the house not knowing where to go. We were not living in the first floor, but the second floor most of the time after we came to this country. So it was very hard to travel in and out.

KY: Were the Americans like you and your family?

SY: The Americans were living in the first floor so it was very hard for us to go in and out. It seems like they did not like us at all. At that time my children were still young and they did not know much so they were playing a little rough too so that is why the Americans did not like us. This is one of the things that was very hard for us. That was not all. After that we knew that the Americans did not like us, then we started to look for a house that we could live in the first floor instead and we did. One other thing that was hard for me was that because my children were young and we lived very close to the street so I was afraid for my children’s safety. There were some of my children who were grown, but two of them that I was very worry about because they were very young.

When we go to school, my husband took the oldest one with him and I took the youngest one because I was still breast feeding her. We each took one with us.

KY: Okay.

SY: But we went to school at different times too.

KY: Okay.

SY: My husband went to the morning session and I went into the evening session. When my husband went, he went with his friends by car, but for me I had to take the bus.

KY: Okay. Was it easy for you to take the bus?

SY: It was not easy at all because I had to take my youngest child with me.

So when I go I had to carry my child with me and that’s not all. Sometimes after you were boarding the bus and there was not seat available so I had to hold on to my child on one hand and the other hand holding onto the pole standing.

So that was one of thing that was hard for me.

KY: Okay. When you were living in their house, did you know how to use the appliances?

SY: We had others who came before us so they taught us how to use those appliances. They taught us how to use the toilet, the stove, and everything around the house. They taught us how to use all of those so we knew and used them accordingly.
KY: Okay. Was there anything that you had learned or knew of either back in Laos or Thailand that helped you after you came to this country? Those things that had helped to make your life in this country much easier. Was there anything like that?

SY: Those were the knowledge that I had gained on how to cook for the family.

KY: Okay.

SY: That was it. There was nothing that I was an expert in, it was just that I knew how to cook which I learned it myself. But if we are going to talk about those things in this country such as how to use their appliances, I did not know them either.

KY: Okay. After you came to this country, were you going to school or were you working? What did you do so that could help to make your life in this country much easier?

SY: After we came to this country, we had gone to school too.

KY: Okay, so you did go to school for awhile, right?

SY: Yes.

KY: Did you receive help from the welfare department?

SY: They helped us too. They helped us for a period of time which it allowed us to go to school.

KY: Okay. After all, do think that this country is a country that treated the women much better? Do you thing that this country is a good place or is a good country for the women?

SY: This is a country that both the women and men had the same equal rights. So this is a good country. Its not bad at all because back in our old country regardless of how smart the women were, they had no rights at all.

KY: Yes. Okay...

SY: But after we came to this country regardless of how educated or uneducated the women are they had the same equal rights as men so they had more respect from the men because of this.

KY: The men have more respect for the women, right?

SY: Yes, they have a little more respect for the women and they treat the women much better. It seems like the women feel a much more important than before.

KY: Okay. Do you think that this country, America is your home now?

SY: After we came to this country, I knew this is the last destination for us. Regardless of if I was death or alive, this is it for me, so I do consider this is my home.
KY: Okay… Have you become a U.S. citizen?

SY: Right now, I had decided to become a part of this country.

KY: So you had received your U.S. citizenship, right?

SY: Yes, I have.

KY: Okay, did you go to vote?

SY: No, I have not gone yet.

KY: So you have not been to vote for the leaders yet, right?

SY: No, I have not gone at all.

KY: Okay. What do you think about the Hmong people? In your opinion, what do you think about those Hmong candidates that had gone to compete with the Americans for offices in this country?

SY: In my opinion, I thought that maybe the reason they decided to run for office was that there were lots of Hmong people who came to this country so if they had been elected then they could help the Hmong people much better. So this is why some of them are running for office and to see if they could win or not.

KY: Okay… From now on we are going to talk about the duties of a woman outside of her house and see what are the duties of those women in this country? I am going to ask you question about those. Right now, do you know anything about leadership either in this country or back in our country during the war? Had any taught you about this during the war or did you know that there was a war going on regardless of if you were back in our old country or right now in this country?

SY: Oh… During the time that we were living back in our country, there is no need for someone to teach you that there was a war going on. Ever since I was a little girl who started to realize what was going on, when I knew how to go to and from the farm, there was a war going on since then. The old folks told me that there were wars going on before I was born. So there were wars going on for all those years and as I rememebered, my parents moved us from place to place. They moved us into the caves on the side of the mountain for about two to three days then came back to the city for two to three days and then moved back into the jungle. We were moving all over the places to get away from the war. We did that until the our country was completely fallen to the communists and then we moved to this country, America.

KY: Okay, what about right now while we are living in this country, have you heard of that there were wars going on in other countries…? Or do you know what the lives are like in different countries?
SY: I don’t know and everything I knew I saw it from the television. I only knew what I saw on the television.

KY: Okay, is there…? Right now, do you know of any leaders who are women that hold important jobs such as they were leaders of an organization or something like that?

SY: Right now I just knew of a few of them such as Mrs. Lee Tou.

KY: Mrs. Lee Tou… Is there anyone else?

SY: There are others too, but I don’t know there names.

KY: Do you know what kind of work does Mrs. Lee Tou does and where is she working?

SY: She works at the Hmong Women Association that is based in Minneapolis.

KY: Okay, she works at the Hmong Women Association in Minneapolis, right?

SY: Yes…

KY: Okay.

SY: I knew that because I used to help them by providing day care for them.

KY: Oh… So you had worked and helped that organization too, right?

SY: Yes…

KY: What did you do when you were there?

SY: I provided day care, baby-sitting.

KY: Did you help them baby-sit, right? Okay.

SY: Yes...

KY: Do you see that the role of women’s leadership changes in this country?

SY: I am not sure about that.

KY: Do you think that the role of women’s leadership has changed dramatically in this country?

SY: It has changed a lot because I think that after we have come to live in this country, we have equal rights for everybody. It does not matter if you are a man or a woman, you have the same rights as the other. They had held other positions that were only held by the men. If there is a
discussion or something like that the woman can be part of it because they have the same equal right as the men to be there. They had held other top position in turn of their work so I think that the Hmong ladies has improved a lot.

KY: Do the Hmong woman has the right to go to school?

SY: Yes, they do. The Hmong women have the same rights as everyone else after we had come into this country.

KY: What are the things or jobs that the Hmong women have or can do in this country that they could not have or do back in our old country?

SY: It started with going to school to get educated so that they could go out and work with other people. Because of their education, they could go out and work for themselves and their family. They do not have to wait for their husbands to provide for them anymore and this is a good thing for our people.

KY: Is there anything that you wanted others to recognize and rememeber about what our Hmong woman have or had done to help out their families and other people?

SY: Regarding the works of the Hmong women in this country, I think that they are… In addition to helping at home, they are going school to get more education, they taught their children and they have helped in other organizations. There are lots of Hmong women that have been educated in different areas to help our people. They have to help out our Hmong people, the ones who are less educated than they are and this is a good thing for us right now.

KY: Okay, right now I am going to ask you this question and it’s the last one. Do you have anything else to add or say other than those things you have talked about? How do you want to conclude this after all that we had talked about?

SY: I think that back in our country, we, the Hmong women did not know much about anything. Becuase of the lack of education among our Hmong woman and even though they are very smart, but because they had no education so they were considered not knowing much (ruam). But after we came to this country, there are some who have gone to school to get their education and now some of them are very educated or know many languages so we have to remember to respect our men and put them in a higher position than us.

This is because regardless of how highly educated you are if you do not have your husband then other people will not respect you. We must look up to our husbands and respect them and they need to respect us as women too. We must love our husband and don’t just say that huh… As long as we are living in this world, things are not going to be good all the time or bad all the time. There always going to be conflicts in a family, but we must talk about it in a positive way and don’t just call the police every time there is a conflict.

This is what I wanted to leave with all of our Hmong women that regardless of how mad you are, you should not call the police every time there is a conflict to do this and do that. You need to be
patient with each other and stretch your hearts for each other. You must encourage each other in
the positive way and we must put our husbands in a higher place than us and respect them as our
husband. If we are doing this, other people will respect us. This is all that I have to say.

KY: Thank you.
